DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 6-52 and 64-92 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bains et al.'584 (Bains). Bains discloses a computer readable storage medium (figures 1-6) containing a program element, the program element comprising a first program component 510 causing a computer to deliver first information to a user about available transportation services figure 4, reference numeral 52) and prompts the user to enter information about desired shipping needs (column 5, lines 21-60), a second program component 511 for receiving information about available pool of shipping resources based on entered criteria and limited or "filtered" with respect to that criteria (column 6, 54-64) and a third program element for computing price based on provided "filtered" criteria (column 6, lines 60-64. Also, Bains shows the user receiving information via a computer screen 39 and entering desired provided information via keyboard 40. Further, Bains shows the information about the

transportation service specifying point of origin, route and destination of the desired goods to be shipped (column 5, lines 38-59) but fails to show the shipping medium being railcars. However, Bains does disclose the shipping medium being maritime freight which is an obvious art recognized equivalent shipping means and the selection of either maritime or rail means would be an obvious matter of choice of design based on given/needed criteria.

In reference to the traversed restriction requirement is the following: Applicant's arguments have been carefully considered and in view of such the restriction requirement for claims 31-52 and 64-69 has been vacated.
